

Electronic Discovery and Computer Forensics in Financial Fraud

As we face a worldwide economic crisis and companies are under continued pressure to make financial metrics, fraud is rampant among organizations of all sizes. Do you have unmet needs in financial fraud investigations? At Digital Mountain, we have solutions to address this growing problem. We empower fraud detection through our electronic discovery and computer forensics services to law firms, corporations, government entities and financial forensics firms. We also enable accelerated document review through FileQuest, our advanced Web-based data discovery solution. The following represents our value-added solutions used in uncovering financial schemes:

Electronic Discovery Services. Digital Mountain provides electronic evidence collection and data discovery processing services for files stored on all major operating systems. We can extract and process data from a variety of storage media such as hard drives, tapes, DVDs, CDs, storage arrays, smartphones and tablets. We also assist in making financial accounting records, stock option software or other applications viewable for further analysis by financial forensics firms.

Computer Forensics Services. Go beyond active email and other available files. We can uncover critical evidence through our computer forensics efforts by looking at deleted files, slack space, swap

files, unallocated space, Internet artifacts and other ambient areas of a computer system where data resides. We seek and find valuable evidence through Internet-based email accounts, instant messaging sessions and data found on the Web.

FileQuest, Web-Based Review. FileQuest is an advanced Web-based data discovery solution that empowers organizations to seamlessly perform their own data extraction, filtering, processing, review and production of documents. With our robust, fully integrated platform, FileQuest dramatically reduces the time required for data discovery while minimizing costs. Our Software as a Service model eliminates the need for your organization to maintain any software or hardware. FileQuest provides you with accelerated data discovery on-demand with no fixed up-front costs. With our flexible model, you can go solo and do it yourself or go tandem with our project management team's assistance.
